

Special Track:

Artificial Intelligence Education

The Artificial Intelligence in Education special track is devoted to methods of teaching artificial intelligence where AI educators can freely exchange ideas and resources. This forum is also intended to contribute to AI education literature by documenting common ways of teaching core AI topics. The topics discussed will include, but are not limited to implementation of the computing curricula 2001 intelligent systems area; model assignments, experiences, and syllabi for AI instruction; AI classroom techniques or innovations for undergraduate and graduate instruction; intelligent applications for instruction of AI and assessment of such applications; and incorporating AI research into AI courses.
